

Program Description-Non-thesis Program

Students wishing to enroll in the non-thesis program must first apply to the Department of Biological Sciences and must meet the admission requirements of the department.

****Only the Department can permit a student to enter the degree program in Biology.** Acceptance by the Graduate School is not the same as acceptance into the non-thesis program in Biological Sciences.

For students to begin in the Fall semester, the application deadline date for regular admission to the Department is 1 February. The deadline is November 15th for students preferring to begin in the Spring semester. Final cut-off date for processing new applications is 1 August. However, very few departments actually continue to review applications this late.
