Web Application Developer

Position Overview
We are currently seeking a mid-level full-stack developer to join our team. The primary responsibility of this position is the development of new features and updates to existing components inside the eMerge web application. Be part of our dynamic and close-knit development team. The tasks and projects will present many opportunities to gain experience with different platforms, frameworks, and libraries.

Education
- BS in Computer Science or related degree

Experience
- 4+ years of full-stack experience or similar
- Web development languages (PHP, Python)
- MySQL design and optimization
- Javascript, jQuery, CSS
- Backbone.js, Underscore.js, or similar frameworks
- Responsive web design and layout
- Git/version control systems (preferred)

Duties and Responsibilities
- Work within an existing MVC structure to add new features to the platform
- Build reusable controllers and models
- Adhere to established coding and documentation standards
- Design and implement front-end UX/UI
- Update existing component with new interfaces and structure

Required Skills
- Time Management – Ability to work within project timelines and manage tasks to ensure project completion.
- Flexibility – Ability to work with different code bases and understand site structure from many types of websites.
- Self Motivation – Ability to work with a team, but also alone on smaller projects.

Benefits
- Competitive Salary;
- 401K;
- Health Benefits;
- Paid Leave/Holidays;
- Beer Fridays!

About NMD Inc. | eMerge

NMD, Inc. is the developer of eMerge (easyemerge.com), a SAAS based digital marketing solution. NMD also develops interactive websites for a wide variety of businesses and entities. We are conveniently located in downtown New Orleans.

Other Considerations
This is a full-time on site position. If you have what it takes to be a part of something truly amazing, please submit your resume directly to gethired@easyemerge.com.
