### Direct Deposit Program

---

# who

...should take advantage of this program?

We strongly recommend that all students receiving any type of financial assistance including loans, grants, scholarships, work study or any other assistance sign up for this program. This will ensure that funds from any refunds that you may receive are available to you as quickly as possible.

# what

...are the advantages of signing up?

If you take advantage of this program, funds will be electronically deposited into your bank account and available to you without delays associated with the processing of paper checks including potential delays in the mail system.

...are my choices for receiving my refund?

1. You can have your funds directly deposited into your checking or savings account. (*This is the preferred method*).
2. You can still have your refund check mailed.

...if I don't have a checking or savings account?

For students who do not already have a checking or savings account, all you have to do is visit one of our local banks and open an account.

...if I am a student worker, can I have my payroll check direct deposited?

Student worker checks can be direct deposited into their checking or savings account. However, if you are receiving other financial assistance, both your refund and student worker check must be direct deposited.

...if I am already receiving federal aid and worried about this impacting my award?

The direct deposit program does not have any affect on the type or amount of aid awarded to students. It simply helps us get your money to you faster!

# when

## .....are refunds processed?

All refunds are processed on a weekly basis, with the first group of loan refunds being electronically deposited on the Friday after classes begin for the fall and spring semesters.

## .....will funds be available to me?

If you are participating in this program, you will have access to your refund on the same day that the funds are electronically deposited into your account.

## ....do I sign up? Signing up is as easy as 1, 2, 3...
