# Faculty Scholarship: Technology Educator of the Year

**The Louisiana** Technology Council named John Fulwiler, Southeastern professor of educational leadership and technology, Technology Educator of the Year. Fulwiler was recognized for his work as chair of the fourth annual Northshore Excellence in Teaching with Technology (NETT). These annual awards celebrate and recognize innovation and achievement for those who have made a positive impact in technology in our area.

**Fulwiler** has been a prominent leader in ensuring technology training for the region's educators. He played a key role in the successful collaboration between Southeastern, Delgado, and the Tangipahoa, St. Tammany, Washington, Livingston, and St. Helena Parish School Boards, which now provide opportunities for educators of those organizations to receive hands-on training and suggestions for integrating technology in the classroom.

**Fulwiler** said that since Hurricane Katrina, the 84-mile I-12 corridor between Baton Rouge and Slidell has become a “linear center” of economic activity. “One common unifying factor that is critical to support the growth and change is technology,” he said. “It is an opportune time for the professional education community to partner with those in the economic community to better serve the growing needs of the region.”
