

The Center for Student Excellence

The mission of the Center for Student Excellence is to work in partnership with the University academic departments and surrounding community to assist students in becoming active, responsible, and successful learners. The Center is committed to creating an environment which fosters student development and retention.

To fulfill this mission the Center for Student Excellence provides specific programming and resources that encourage students to develop the skills and strategies that enhance academic achievement, personal, and professional growth. Resources include career exploration and academic planning for students who need information for making life-impacting decisions as well as peer tutoring, supplemental instruction, and advising for academic success in college. The Center also coordinates the delivery of Southeastern (SE) 101, the University's required academic success course for beginning freshmen.
